Professional Summary

Computer Science graduate specializing in full-stack web development with the MERN stack and JavaScript/TypeScript. Skilled in building responsive web applications, RESTful APIs, authentication systems, and database-driven solutions using React, Node.js, Express, and MongoDB. Experienced with API integration, database schema design, and modern frontend development, with a focus on solving practical software development problems through well-structured applications.

Education

Hemwati Nandan Bahuguna Garhwal University (HNBGU) - Srinagar, Uttarakhand
Bachelor of Science (Honours) in Computer Science **Aug 2022 – June 2026**

Key Skills & Technologies

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React, HTML5, CSS3, Tailwind CSS, Material UI (MUI)
Backend: Node.js, Express, RESTful API Design & Integration, Authentication (JWT, OAuth), Middleware Development, Socket.IO, Redis, Multer, Morgan
AI & Smart Web Feature Integration: OpenAI API/LLM Integration, Prompt Engineering, Predictive Modeling, Python Data Libraries (Pandas, NumPy, Scikit-Learn)
API Validation & Security: Zod, Express Validator, Bcrypt, CORS, Helmet, Rate Limiting
Tools & Testing: Git, GitHub, Postman, Bruno, Supertest, MongoDB, npm
Databases & Data Management: MongoDB, Mongoose ODM, MySQL, Schema Design & Query Optimization
CS Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS, Linux/Unix

Professional Experience

369innovation - Intern - Associate Software Developer
LaBaKa Project | July 2026 - October 2026

- Developed full stack features and services using Node.js, Express, MongoDB, and Python following the MVC architecture.
- Engineered 15+ RESTful APIs using Node.js and Express.js with JWT authentication, request validation, custom middleware, and API security controls.
- Implemented authentication & access control for 3 user roles using JWT, bcrypt, CORS and rate limiting.
- Built analytics dashboards and geolocation views using React, Material UI, and Recharts.
- Integrated Razorpay payments, QR-code generation, and Firebase Admin notifications, while designing MongoDB data models with Mongoose ODM.
- Resolved 30+ bugs and collaborated with a 4-developer team using Git/GitHub for feature development, debugging, and code integration.

Projects

Naaz – Industrial Plywood E-Commerce & Factory | [GitHub Repo]
Tech Stack: MERN, Tailwind CSS, shadcn/ui, Radix UI, JWT, bcryptJS, Nodemailer

- Built a full-stack eCommerce and factory order management application using React, Node.js, Express, and MongoDB with responsive Tailwind CSS interfaces.
- Created 13+ RESTful APIs using Express and Mongoose ODM, with JWT-based authentication, bcrypt password hashing, and backend validation.
- Added 9 responsive pages using React 19, Vite, Tailwind CSS, shadcn/ui, and Radix UI, incorporating reusable components and Nodemailer-based email workflows.

Certifications

Machine Learning, Data Science & AI Engineering with Python | **Udemy**
Database Management & SQL 101 | **IBM Developer Skills Network**
AWS Certified Prompt Engineering Specialist | **Amazon Web Services**
